

10/30/03

To whom it may concern,

I am writing in regard to the proposed Court Rule No. 2003-47.  
I am a victim of asbestosis caused from working 32.3 years in the  
Saginaw Grey Iron Foundry.

At the present time I am assuming that I do not have cancer. Who knows  
what tomorrow will bring. The medical field are unable to wash the asbestos  
out of my lungs. It is there and will be there until the day I die.

I presently have trouble breathing and am always short of breath even  
when I am sitting still. The asbestos manufactures and the property  
owners allowed asbestos to be used by people such as my self.

I worked as a TinSmith in the factory. My job consisted of tearing out  
pipes that were wrapped with asbestos. I also removed asbestos siding,  
fan housings, lines and coupalo components. Every day I was in the center  
of some type of asbestos.

I believe I am entitled to any and all compensation that I might receive.  
I don't think the Michigan Supreme Court should be allowed to change the  
law and deny and deprive me of my rights.

Sincerely,

Richard L. Wiesen
